Deadline for manuscript  
submissions:

**15 March 2022**

### Message from the Guest Editors

Dear Colleagues,

The conflict between population, resources and environment in twenty-first century made the ocean the strategic space and resource treasure of human society to realize sustainable development. In order to study the ocean environment and exploit the ocean resources, a fundamental understanding of complex and interwoven ocean processes across a broad range of spatial and temporal observational scales is required. This is heavily relied on various research fleet and equipment to support increasingly complex, multidisciplinary, multi-investigator research projects, including those in support of autonomous technologies, ocean observing systems, process studies, remote sensing, and modeling. Various underwater submersibles are the main working force for the research fleet. In this special issue, relevant experts are invited to report the latest progress on Frontiers in Deep-Sea Equipment and Technology. This special issue is mainly focusing on the recent progress made in China.

Prof. Dr. Weicheng Cui

## Message from the Editorial Board

The *Journal of Marine Science and Engineering* (JMSE; ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

## Author Benefits

**Open Access:**— free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed with Scopus, SCIE (Web of Science), GeoRef, Inspec, and many other databases.

**Journal Rank:** JCR - Q2 (*Oceanography*) / CiteScore - Q2 (*Ocean Engineering*)
